

CRI Lands GSA HSPD-20 System Integrator Award CRI to Provide System Integration Services for HSPD-20

McLean, VA – February 24, 2008 – Communications Resource, Inc. (CRI), was recently awarded an order to provide systems integration services in support of Homeland Security Presidential Directive-20 (HSPD-20). HSPD-20 provides guidance on National Essential Functions (NEF) which are the foundation for all continuity programs and capabilities. NEFs represent the overarching responsibilities of the Federal Government to lead and sustain the Nation during a crisis. CRI will provide a centralized resource to assist agencies in designing and deploying the requirements related to secure and reliable communication for the HSPD-20 continuity programs.

CRI was awarded this order under our GSA Schedule 70 which enables federal and state customers to purchase information technology equipment, software, and professional services. Under Schedule 70, CRI offers the professional services of our knowledgeable and experienced Homeland Security staff at competitive, pre-negotiated rates.

Victoria Johnson, President of CRI, announced that "...this award is especially gratifying in that it is another validation of CRI's quality support in the Homeland Security arena. We continue to grow into more complex and sophisticated areas. Most importantly, it reflects our federal customers' continuing trust in our ability to meet and exceed expectations."

About CRI

CRI, headquartered in McLean, Virginia, has been serving the federal government for over 14 years providing comprehensive support in:

- Integrated Electronic Security Systems
- HSPD-12/FIPS 201 and HSPD-20 Products & Support
- Federal Regulation Compliance Support
