

CRI Secures \$73 Million Global Security Contract from the Department of State

McLean, VA – December 2015 – Communications Resource, Inc. (CRI) Wins Department of State Physical Security Information Management (PSIM) System Contract

The Department of State has awarded a \$73M, ten year contract to CRI for the global deployment of a Physical Security Information Management (PSIM) System. The CRI Team will provide expertise in physical security, geo-spatial engineering, 3D modeling, video surveillance, access control, intrusion detection systems and worldwide system integration and program management. The new PSIM System will provide global situational analysis through real-time analytics and reporting thereby enabling rapid critical decision-making in high threat environments. The CRI Team's PSIM System will realize numerous organizational benefits including increased control, improved situation awareness, improved event management and near real-time management reporting. The results will be improved hardware/software efficiencies and improved security through increased situational awareness. It is a base year contract with nine option periods.

Victoria Johnson, CRI President and CEO, states, *"This is a tremendous win for CRI and a testament to the vision and expertise of our PSIM team. We are excited to be a critical part of the Department of State's global security program. We will continue our focus on state-of-the-art technologies as we help DOS and their facilities remain at the forefront of global enterprise security solutions. I am proud to say that we have set ourselves a step ahead of the best in the field."*

ABOUT CRI

CRI, headquartered in McLean, Virginia, has supported the federal government for over 20 years. We create innovative approaches and exciting products to meet client challenges by balancing the boundaries of technology with a risk-based perspective of customer needs. Our successful engagements encompass physical and cyber security, application development, enterprise architecture, and business process solutions.
