

Capabilities Statement

Established in 2010, SightComm serves federal, state, and local government customers nationwide. We provide exceptional technology, security, and business solutions to our government and commercial clients.

Security

SightComm provides full systems integration of today's leading edge technologies in physical and logical security. Our team of in-house security experts offers a broad range of services including risk assessment, emergency planning, HSPD-12 and PIV compliance support, system design, installation, project management, and maintenance of installed systems. With our knowledge of state-of-the-art products as well as government and industry standards, we specialize in providing our clients with tailored solutions to properly address their unique security requirements.

Business Operations

SightComm supports business operations at both the strategic and tactical levels. We apply business reengineering expertise to improve customer efficiency and to appropriately incorporate new technologies. Our services include: acquisition services, hardware/software refreshment, PMP® based project management services, Integrated Product Team facilitation, and training.

Technology

SightComm offers technology solutions designed to meet customer specific business needs. We follow a full system life-cycle development process that integrates a risk-based approach to cyber security. Our range of technology services encompasses software operations and maintenance, information assurance, 508 accessibility compliancy, enterprise architecture support, COTS implementations, documentation, training, helpdesk services, mobile applications, and independent system testing and validation.
